STATE ACTION
Governor's Office of Planning and Budget
116 State Capitol, SLC, UT 84114
Phone: (801) 538-1535 Fax: (801) 538-1547

1. Administering State Agency: Division of Oil, Gas and Mining 1594 West North Temple Suite 1210 PO Box 145801 Salt Lake City, Utah 84114-5801	2. State Application Identifier Numbers: (assigned by State Clearinghouse) 3. Approximate date project will start: Expanding an existing large mining operation.
4. Areawide clearinghouse(s) receiving State Action: (to be sent out by agency in block 1) Russell Cowley, Director Six County Association of Governments PO Box 820 Richfield, Utah 84701	
5. Type of action: <input type="checkbox"/> Lease <input checked="" type="checkbox"/> Permit <input type="checkbox"/> License <input type="checkbox"/> Land Acquisition <input type="checkbox"/> Land Sale <input type="checkbox"/> Land Exchange <input type="checkbox"/> Other	
6. Title of proposed action: Revision to Large Mining Operations - Ash Grove Cement Company – M/023/004	
7. Description: <p>During Operations: Mining operations include drilling, blasting, loading broken rock, transportation of rock, crushing rock, and rock storage. Limestone, after being pulverized, is blended with other raw materials to produce kiln feed for the manufacture of Portland cement. All mining operations are conducted using conventional mining equipment, including drills, 100 ton haul trucks, dozers, grader, trackhoe, loaders, feeder breakers, belt conveyors and a stacker/reclaimer. The total resource recovery for the life of mine is estimated to be approximately 75 million tons. The quarry life is estimated at 62 years. Approximately 1,200,000 tons of limestone are scheduled to be recovered each year. About 1.1 million tons of waste shale will be disposed of both in a waste pile and in the mined out quarry. The proposed quarrying operation will disturb approximately 118 acres for removal of the limestone and shale. Additionally, other lands will be disturbed for the construction of roads, ponds, and mining facilities. A total of 669 acres are included in the proposed Life-of-Quarry disturbance limit. Soils will only be salvaged from areas where it is practical and can be done in a safe manner due to the steep topography.</p> <p>After Operations: All roads except for the loop that extends north from Highway 132 to the railroad (the north road – 1.2 acres) and a road that extends south from Highway 132 to the quarry (the South road – 4 acres) will be removed, ripped and reclaimed. During the process of mining, a heavy chain will be dragged across the highwall face to remove any loose debris. A three foot high berm will be constructed on the edge of the bench below the highwall to catch any debris. Once the highwall or end wall has been stabilized it will not be disturbed any further. All surface water diversion structures and sediment ponds will be removed and the areas reclaimed. The proposed waste rock stockpile will be constructed at a stable slope of 30 degrees. It will be revegetated with an approved seed mix. All features such as buildings, roads (except for the two discussed above), pads, or other structures will be removed and the areas reclaimed during the final reclamation process. Disturbed areas, except for barren rock highwalls, will be graded, stabilized and have topsoil replaced at a 6" depth, and amended with 5 ton per acre of composted manure. Areas not receiving 6 inches of topsoil will have suitable plant growth materials (fines) applied and amended with ten ton per acre of composted manure. All areas receiving topsoil or other plant growth materials will be seeded in either the fall (preferred) or spring. Disturbance will be ripped to reduce compaction, rough graded to reestablish contours and drainage, and final graded to slopes suitable for the use of mobile equipment for the preparation of seedbeds and revegetation.</p>	
8. Land affected (site location map required) (indicate county) All or part of Sections 32, 33, and 34, Township 14 South, Range 3 West and part of Sections 3, 4, and 5, Township 15 South, Range 3 West. The Plant and Quarry are located on the Champlin Peak, Utah and U.S. Geological Survey 7.5' Series Topographic Map. Juab County, Utah.	
9. Has the local government(s) been contacted? Yes, by copy of the notice. Glenn Greenhalgh, Juab County Planning and Zoning	

10. Possible significant impacts likely to occur: None	
11. Name and phone number of district representative from your agency near project site, if applicable: N/A	
12. For further information, contact: Tom Munson, Senior Reclamation Specialist Phone: (801) 538-5321	13. Signature and title of authorized officer:  Permit Supervisor Date: 10/19/01
